HOW TO WASH RAYOSYLK ... AND ARTIFICIAL SILK. ...

Every kind of silk and artificial silk can be safely washed in Lux. Rubbing with bar soap—specially harmful to artificial silk, which loses some of its strength when wet—is done away with when Lux is used. The bubbling Lux suds cleanse the fabric so gently yet so surely—leave the garments exquisitely clean, lustrous, unfaded.

METHOD.

Rayosylk and artificial silk are very fragile when wet, but regain their strength when dry. We recommend the following washing directions:—

Whisk a tablespoonful of LUX into a thick lather in a basin half full of boiling or very hot water. Add cold water till lukewarm. Dip the garment through lather many times, squeezing the suds through carefully. DO NOT RUB. Rinse in three waters of the same temperature as the water you washed it in. Squeeze the water out carefully. DO NOT WRING. Do not use clothes pegs to hang up garment, but pin out on a towel so that original shape will remain. When nearly dry, but still damp, press with a warm iron—never a hot one.

Sydney's
Outstanding
Grocery
Service
offering
Greater
Value
than "Cash
and Carry."

Prices and Stocks at all times subject
to market conditions and fluctuations.

Delivery and Mail Order Instructions

Two things we would emphasise in connection with
our Grocery Service:—

1. Prices are wonderfully low at the same time
as stocks are always fresh and of high quality. Our
huge business takes care of that.

2. Groceries and Provisions are packed and de-
livered, free of charge, to Rail or Steamer, or "For
enclosure" Sydney, but actual freight beyond those
points is additional to quoted prices.

For Wines, we charge 1/- dozen extra for special
packing. For Ales, the packing charge is 1/9 dozen
additional to freight.

Here's a tip: Where your own individual order
would not be very great, try clubbing a few orders
together among your friends to decrease the freight
comparatively. You'll find quite a saving in placing
your general supplies direct with Mark Foy's on this
basis.

THE EYES REQUIRE TWO THINGS:—

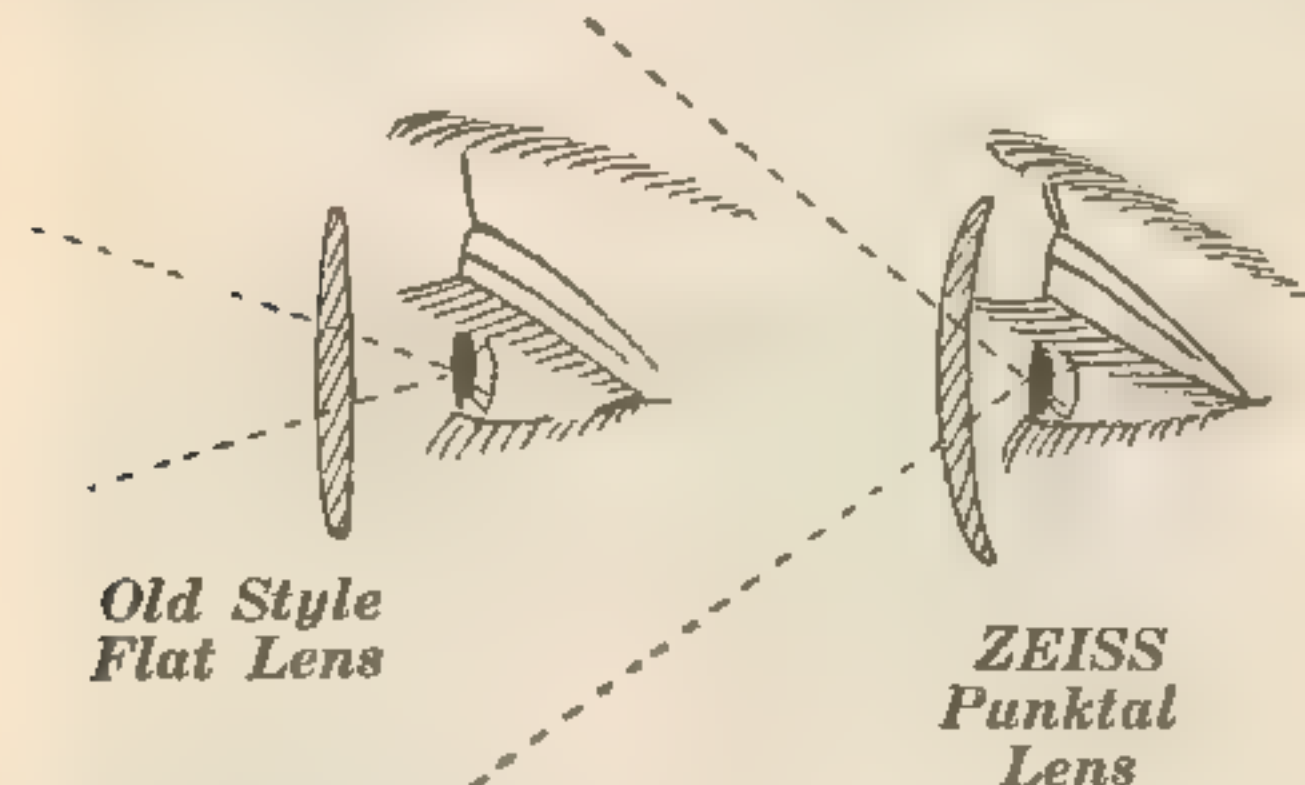

(1) The best optical service in Sight Testing one can command—that is, the service of a fully-qualified Optometrist; (2) The highest degree of mechanical skill in the making of glasses to incorporate the latest and best in Lenses and frames.

SIGHT TESTING AND SPECTACLE MAKING

Every case, from beginning to end, is under the personal supervision of Mark Foy's Optometrist, Mr. W. G. Kett, F.S.M.C., F.I.O. (Lond.), M.I.O. (N.S.W.). Mr. Kett has been in charge of our Sight-Testing Department since its inception twenty-three years ago. He has a very extensive Australian, English, and Continental experience.

Mark Foy's undertake the highest quality optical work only, including Spectacles made from Zeiss Punktal and other Lenses. Sir William Crookes' Glass, Kryptok Bifocals, and Toric Lenses. New apparatus is constantly being added, and no expense is spared to aid us in our endeavour to render THE BEST OPTICAL SERVICE OBTAINABLE.

Zeiss Punktal Lenses represent the nearest approach to perfection ever obtained in Spectacle Lenses. Each lens is specially calculated to give the highest optical efficiency obtainable in a Spectacle Lens. They are not mass production lenses. Each lens is specially designed, and an optical production of unique efficiency. Zeiss Lenses are indelibly marked for your protection.

For sporting purposes, Zeiss graduated, tinted glasses are the highest point in perfection. Prices, from £2/10/-.

Protective Lenses

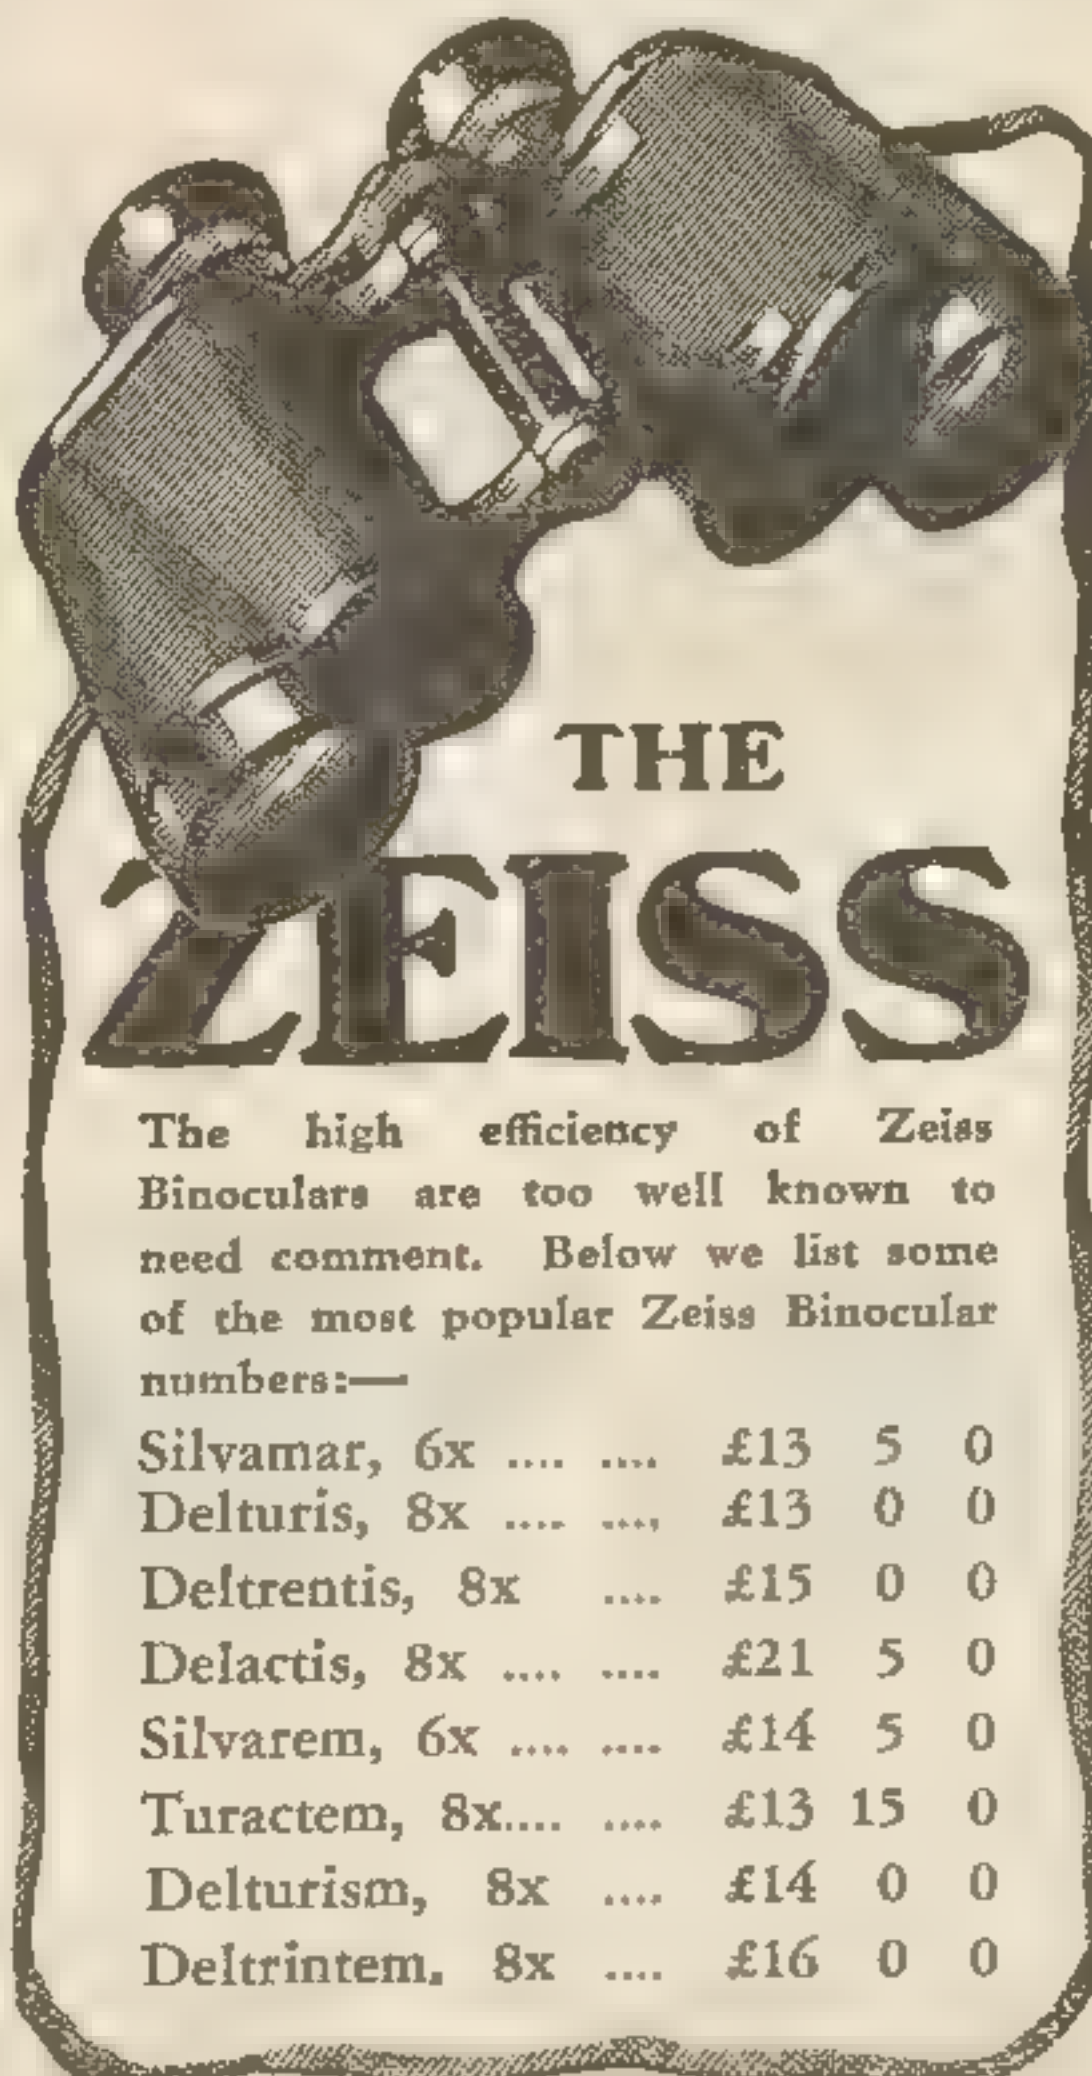

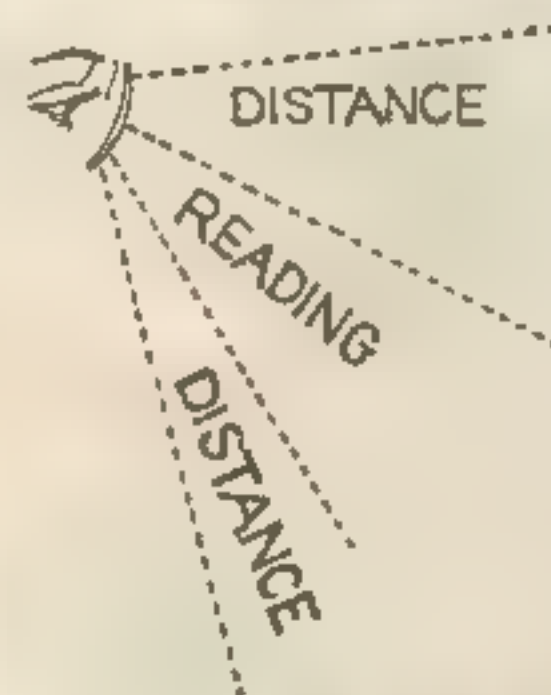

Australia, the land of ever-lasting sunshine, imposes on the eyes of its Anglo-Saxon inhabitants on undue strain which in many cases must be relieved outdoors by protective glasses. Research in recent years has produced very many highly efficient protective glasses, the most useful of which are obtainable from us.

ZEISS

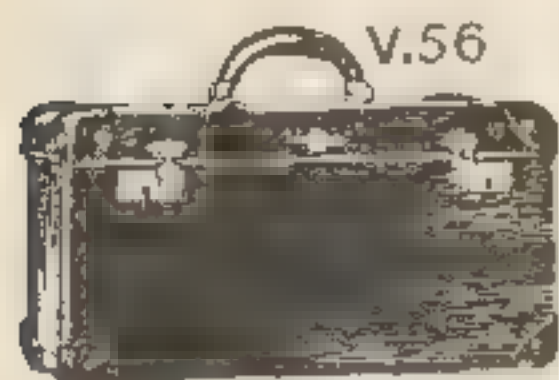

Binoculars

Zeiss Field Glasses derive their superlative qualities from a critical choice of materials—particularly the use of Jena glass with an extremely high light-transmitting capacity—from the strictly scientific construction, and the exacting workmanship which are applied in their production.

It is solely by developing every refinement to its utmost limits, with resultant excellent optical qualities, that Zeiss Field Glasses have achieved their world-wide reputation.

A binocular should last a lifetime, therefore let quality alone influence your selection.
